

OIL SPILL RESPONSE PROGRAMME

Course catalogue

MSTS Asia Sdn Bhd (502823-K)

A contingency plan is essential for any organisation that may potentially be managing oil spill incidents. Preparedness can reduce the cost of damages.

Basic training on oil spill response is vital for any industry personnel who may encounter oil spills at a job site. Personnel equipped with the right skills and knowledge can act as effective first responders.

Our oil spill response training programme comprises of three IMO accredited courses which are conducted using the latest practical training methods available.

Developed and lead by experienced trainers in the industry, these courses are fundamental to oil spill response preparedness. Delegates will gain an understanding and acquire the skills and competencies to manage and lead spill management operations at any level of the response team.

Confidence in a Crisis. Own it.

IMO Level 1

Designed for supervisors and personnel who will lead and manage logistics and waste disposal or be part of an oil spill response field team.

Delegates will be introduced to the fundamentals of oil spill response and be able to implement and manage an efficient shoreline clean-up.

Course duration: 3 days
Certificate validity: 3 years

IMO Level 2

Designed for managers and supervisors who will lead or supervise oil spill response teams and those who support responsibilities within an incident command or emergency team.

Delegates will gain an understanding of the safe and efficient response to oil spills, be able to undertake initial assessments of spill risk, initiate a response to an oil spill, identify priorities for protection, choose the correct response options, identify the limitations of response options and equipment and understand the needs of the media.

Course duration: 5 days
Certificate validity: 3 years

IMO Level 3

Designed for all senior managers, administrators and senior officials who will be the decision makers in planning for or managing the response to an oil spill.

Delegates will acquire skills to perform the role of the Incident Commander. Delegates will gain an understanding of the complexities of oil spill management and consider the political and media pressures, the legal and financial implications, the issues of public and response personnel safety and the post-operational requirements.

Course duration: 4 days
Certificate validity: 3 years
